

Moscow Metro turns 86!

05.20.2021, Moscow

On May 15, Moscow Metro celebrates its 86th anniversary. The first section of Moscow Metro opened in 1935 and was 11.2 km long. Now it has 338 stations and 805 km and continues to grow. Today, it is one of the largest metro systems in the world that comprises 278 stations, 15 lines and more than 12 thousand trains that daily run through the network.

Throughout the decades, Moscow Metro has been proving its reliability and safety. It is a leader in punctuality – 99,98%, intensity – 90-second headway during peak hours and passenger satisfaction. In recent years, it has demonstrated its pioneering spirit with such innovations as Wi-Fi on trains, rolling stock renewal and modernization of the ticketing system.
