ONLINE COURSE

# ON-DEMAND TRANSIT FOR NORTH AMERICA

## 8 - 18 NOVEMBER 2022

The **On-demand Transit** training programme provides the opportunity to enrich the traditional public transport offering and diversify the service portfolio. This helps attract new user groups who may currently depend on private vehicles.

**Join us for this online course** as we help contextualize the versatile practices of on-demand transit.

**Limited seats available**

'Early Bird' rate ends 28 October 2022

**Register Here**

Demand-responsive transit (DRT) services have existed both formally and informally for a long time. New developments in communication and sensor technology have enabled such services to grow substantially in urban, suburban and rural areas.

As a technology-driven share transport service it operates with flexible schedules and stops, and/or flexible routing. Its key differences with traditional public transport is that services are provided in direct response to the demand from customers.

This is useful where the cost of the fixed route or the fixed route schedule service is unusually high in proportion to the demand such as in sparsely populated areas or during random times of the day. It also useful in first/last mile connectivity.

This training will contextualize multiple ways of delivering on-demand ridesharing through a combination of theoretical and practical frameworks. Participants will have a better understanding of best practices, tools, skills and solutions needed to implement a similar framework for their organisation and cities.

## REACH YOUR OBJECTIVES

- Broaden your knowledge and widen your perspective of on-demand transit by learning from industry leaders.
- Understand the suitability of on-demand transit within a public transport network and its use cases.
- Discuss the key ingredients for successful deployment: from operational, infrastructural, technological and regulatory perspectives.
- Get hands-on experience during the deployment of demand responsive vehicles workshop.
- Learn best practices from North America and Europe.

## WHO IS IT FOR?

- Staff from public transport planning departments.
- Strategy planners, mobility planners and land use planners.
- Professionals working on transport and urban policy.
- Professionals working for transport authorities and city governments, operators and consultancies.
- The course is suitable for participants from companies worldwide.

## INSPIRING TRAINERS

**Jaspal SINGH**
*Senior Expert IT & Development Knowledge & Innovation, UITP*

**Lidia SIGNOR**
*Combined Mobility Manager Knowledge & Innovation, UITP*

**Simon MINELLI**
*Director Research, Technical Services & Industry Programs, CUTA*

**Chris PANGILINAN**
*Vice President for Paratransit, MTA New York City Transit*

**Kit CHIU**
*Partnerships Principal, Via*

**David COOPER**
*Principal, Leading Mobility Consulting*

**Matthew LATTAVO**
*Transit Innovator, Left Turn Right Turn*

**Adrià RAMIREZ PAPELL**
*Service Design Manager, Swvl*

**Richard TREE**
*Executive Director, Tulare County Regional Transit Agency (TCRTA)*

**Jack PHELAN**
*Project Manager, Durham Region Transit*

**Trevor STEFFLER**
*Conventional Operator & Operations Supervisor, Durham Region Transit*

**Jean-Baptiste MAUR**
*Senior Planning Advisor, Flexibus Réseau de transport de la capitale (RTC)*
