

The Buenos Aires subway invites companies interested in the international tender for the acquisition of new rolling stock

Different meetings will be held starting Monday, January 22nd . Deadline for registration is next Friday, January 12th

Buenos Aires, January 9, 2024

Within the framework of the International Public Tender No. 234/2023 for the acquisition of rolling stock for Line B, Subterráneos de Buenos Aires S.E. (SBASE) invites interested companies to participate in a technical visit to the part of the network where the units to be acquired will provide service.

The series of tours will begin on Monday, January 22 and to register you must send an email to licitaciones@sbase.com.ar until Friday, January 12 at 1 p.m. with the following information: full name and identification document number of the person/s who will attend on behalf of the company -maximum 5-. Each visit will have a maximum capacity of 10 participants.

The tour will visit the Urquiza and Rancagua workshops, and the Juan Manuel de Rosas, Carlos Gardel, Leandro N. Alem and Federico Lacroze stations.

The tender seeks to purchase 96 vehicles for Line B, with the aim of replacing the Mitsubishi fleet that is, on average, 60 years old. In this way, the most used line on the network, which connects Leandro N Alem with Juan Manuel de Rosas, will have 100% of its cars with air conditioning (today it is at 46%).
