Join UITP Academy and our partner LTA Academy for this 3-day, in-person training programme. Acquire the knowledge and skills necessary to tackle challenges and devise solutions, to prioritise public transport.

Limited seats available
Early bird rate ends 29 March 2024

Register Here
HERE'S WHAT YOU WILL LEARN

- Understand the vital role of public transport in urban mobility, accessibility, and sustainability.
- Identify challenges in traffic congestion and ineffective management impacting public transport.
- Acquire strategies to optimise traffic flow, reduce congestion, and enhance public transportation reliability.
- Comprehend sustainable transportation principles and integrate eco-friendly options into transport networks.
- Harness emerging technologies like intelligent transportation systems real-time data analysis, and smart traffic signals.
- Build policy and planning skills for effective urban development strategies.

WHO IS IT FOR

- Transportation Professionals: Including traffic engineers, urban planners, public transport operators, and traffic management experts
- Policy Makers and Government Officials: Those responsible for shaping transportation policies, regulations
- Staff from industry worldwide involved in the market uptake in this area: ITS service providers, new mobility app-developers etc.

A TOP LEVEL METHODOLOGY

- Participate in interactive sessions which include an introduction by course leaders and open discussions with participants
- Exchange your current practices and experience with your peers
