The training will be conducted in English with a Simultaneous Interpretation (SI) in Chinese

WHY CHOOSE AN ONLINE COURSE?

- › Interact with public transport professionals from across the world
- › Be time efficient, with 9 sessions over a 2-week timespan
- › Flexibility to join the sessions from any location in the world, at work or at home

LEARNING OBJECTIVES

- › Broaden your knowledge and perspective on Intelligent Transport System (ITS) in public transport
- › Discover the intelligent vehicles and components: sensors, IoT, telematics, fare collection, passenger information, connected & Autonomous vehicles
- › Learn the importance of traffic control, bus stops, smart depots and charging infrastructure in creating intelligent infrastructure
- › Understand the impact of intelligent operations for efficient operations
- › Intelligent management such as ADAS, DSM, driver health management, and OD data analysis
- › Learn the importance of real-time occupancy data to improve safety and avoiding overcrowding
- › Learn from best practice from all round the world: showcases from local operators, authorities and the industry

TOPICS INCLUDE

- › Introduction to Intelligent Transport Systems
- › Intelligent Infrastructure
- › Customer Centricity
- › Emerging technologies
- › Intelligent Safety & Security Management
- › Data sharing & Innovation
- › Cybersecurity

UITP Training Programmes and all related processes are certified for ISO29990:2010 – the standard for learning services for non-formal education and training.
