

## PRESS RELEASE

### Public transport metrics from 46 cities worldwide: UITP publishes the Global Urban Mobility Indicators Report

**Brussels, Belgium**

*12 September 2024*

#### **The 2022 GUMI report analyses public transport across 46 cities worldwide**

Containing 10 benchmarking pages and 46 in-depth looks at cities across the globe, UITP has launched the annual [Global Urban Mobility Indicators Report \(GUMI\)](#), outlining public transport metrics from around the world.

For each of those cities the report outlines key figures such as ridership, the number of lines, and the number of vehicles - it also looks at the presence of services like vehicle sharing, open loop payments and waterborne services.

*Did you know that in 2022 a public transport fare in Jakarta, Delhi and Bangalore was just 0.10 USD?*

*Or that Beijing had 1,537 bus vehicles per million inhabitants, and that 72% of those vehicles were battery electric?*

The GUMI Report bundles public transport metrics from 46 cities worldwide. It analyses 27 key indicators, highlighting trends, challenges, and innovations in urban mobility, providing insights for policymakers, urban planners, and transport professionals.

## ***An annual public transport benchmark...from UITP and our members***

By benchmarking key indicators like affordability, network length, and sustainability, the report paints a picture of the global urban mobility landscape.

For each of the 46 cities included, the report outlines major metrics such as ridership, the number of lines and the number of vehicles in a tailored factsheet. It also looks at the presence of services like vehicle sharing, open loop payments and waterborne services.

The GUMI Report is based on desk research, with figures collected from public sources.

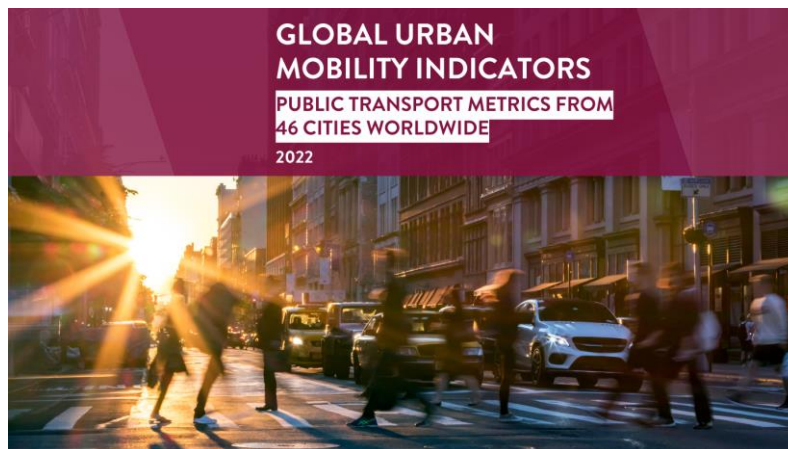

However, when certain data were unavailable or unclear, UITP utilised its network of over 1,900 members to gather additional information, resulting in a publication featuring impressive methodology, benchmarking and city factsheets.

Featuring 46 international cities, the GUMI report covers the globe from Amsterdam to Vancouver, from Prague to Melbourne.

Over the coming years the report will be updated annually, and in this process UITP intends to grow the list of cities gradually, making the resource even more valuable.
